

The 24 Possible Left Hand Fingering Combinations

Robert Higginbotham

Practicing these fingering combinations will help to develop left hand finger independence and right hand picking. There is enough material on this page to last you for a few decades. These should be practiced anywhere and everywhere up and down the neck. Here are the combinations, and then we can talk about how to practice them.

- | | | | |
|------------|-------------|-------------|-------------|
| 1. 1-2-3-4 | 7. 2-1-3-4 | 13. 3-1-2-4 | 19. 4-1-2-3 |
| 2. 1-2-4-3 | 8. 2-1-4-3 | 14. 3-1-4-2 | 20. 4-1-3-2 |
| 3. 1-3-2-4 | 9. 2-3-1-4 | 15. 3-2-1-4 | 21. 4-2-1-3 |
| 4. 1-3-4-2 | 10. 2-3-4-1 | 16. 3-2-4-1 | 22. 4-2-3-1 |
| 5. 1-4-2-3 | 11. 2-4-1-3 | 17. 3-4-1-2 | 23. 4-3-1-2 |
| 6. 1-4-3-2 | 12. 2-4-3-1 | 18. 3-4-2-1 | 24. 4-3-2-1 |

Practice Tips

Use a metronome with these exercises. Locking in with the metronome prepares you to lock in with other musicians. Using a metronome also sharpens/maintains your internal clock. Repeat each pattern many times in a row. Four beats per measure with no rests. Once comfortable with four beats to a measure, incorporate other time signatures.

Repeat on one string up and down the neck ascending and descending
Repeat across strings ascending and descending

Don't try to play all 24. It is better to focus on a few for a week or two then move on.

Once you are comfortable with a particular pattern, challenge yourself by introducing string skips. These will create some great challenges and occasionally some great sounds. Here's an example of pattern #1 with string skips introduced.

(Musicians Institute calls this exercise 'the spider')

Accent beat one of each 4 beat grouping. This way exercises 10, 17 and 24 above don't 'morph' into sounding like exercise 1.

For added fun, accent different beats. Count while you exercise.

Even more challenging, play each four note grouping as triplets and listen to the the rhythm resolve every twelfth beat.

Start slow. Speed will come with practice. Keep all motion economical. Make sure all your notes sound good. Focus on the combinations that are harder and work them out.
